

Found Animal Tips:

If you found a healthy cat (not injured or emaciated):

PUT IT BACK where you found it. It most likely has an owner and was just enjoying a walk around the neighborhood!

If you found a sick/injured dog or cat:

Take to a local vet or animal shelter for immediate medical care

If healthy, please shelter in place with this pet while doing the following to locate the owner:

1. CHECK FOR MICROCHIP: Take to local vet, shelter, pet store to scan for chip*
2. YARD SIGNS: Make a big sign for your front yard- Keep it simple: FOUND DOG/CAT/RABBIT Size, Type (if known), Color, Sex
3. SOCIAL MEDIA: Post animal picture and FOUND notice of local "lost and found pet" Facebook pages, craig's list, Nextdoor and any other city or neighborhood specific social media group available
4. FAXED NOTIFICATIONS:
Go to www.lostmydoggie.com/package/options.cfm choose free option, you can then enter the info and photo. This information is immediately faxed to Animal Shelters, Vet offices, rescue groups, etc. Many OWNERS have been found this way!
5. NEIGHBORHOOD SIGNS: Print flyers from www.lostmydoggie.com (yes, they help cats too!) Post flyers on telephone poles or other neighborhood boards – Note, if a pet is missing the owner is most likely walking or driving the neighborhood searching for them so signage will still work.

PLEASE CONTACT THE SACRAMENTO SPCA IF YOU NEED EMERGENCY (limited) SUPPLIES TO CARE FOR YOUR NEW HOUSEGUEST!
